

D
Das beigefügte Wandbefestigungsmaterial (Dübel und Schrauben) eignet sich nur für ein festes Mauerwerk (Beton- bzw. Ziegelwände ohne zusätzliche Isolierung). Für andere Wandtypen, wie zum Beispiel Gipskarton-, Gasbeton- oder Hohlraumwände sind für eine feste Verankerung Spezialdübel und evtl. längere Schrauben oder Haken erforderlich.

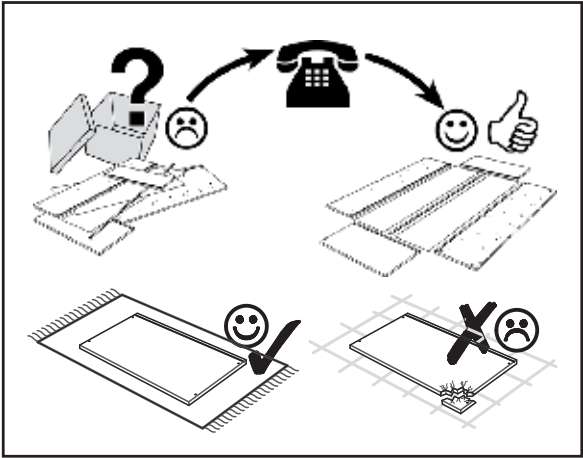

FR
Les matériaux fournis de fixation au mur (chevilles et vis) ne sont conçus que pour une maçonnerie compacte et solide (murs en béton ou en brique sans isolation supplémentaire). Les autres types de murs tels que les parois en placoplâtre, en béton cellulaire ou en matériau alvéolaire, exigent des chevilles spéciales et des vis ou des crochets éventuellement plus longs pour avoir un ancrage solide.

E
The included material for attaching the item to the wall (wall-plugs and screws) are only suitable for solid walls (concrete or brick walls without added insulation). Special wall plugs and possibly longer screws or hooks are necessary for a secure hold in other types of walls such as plasterboard, autoclaved aerated concrete or cavity walls.

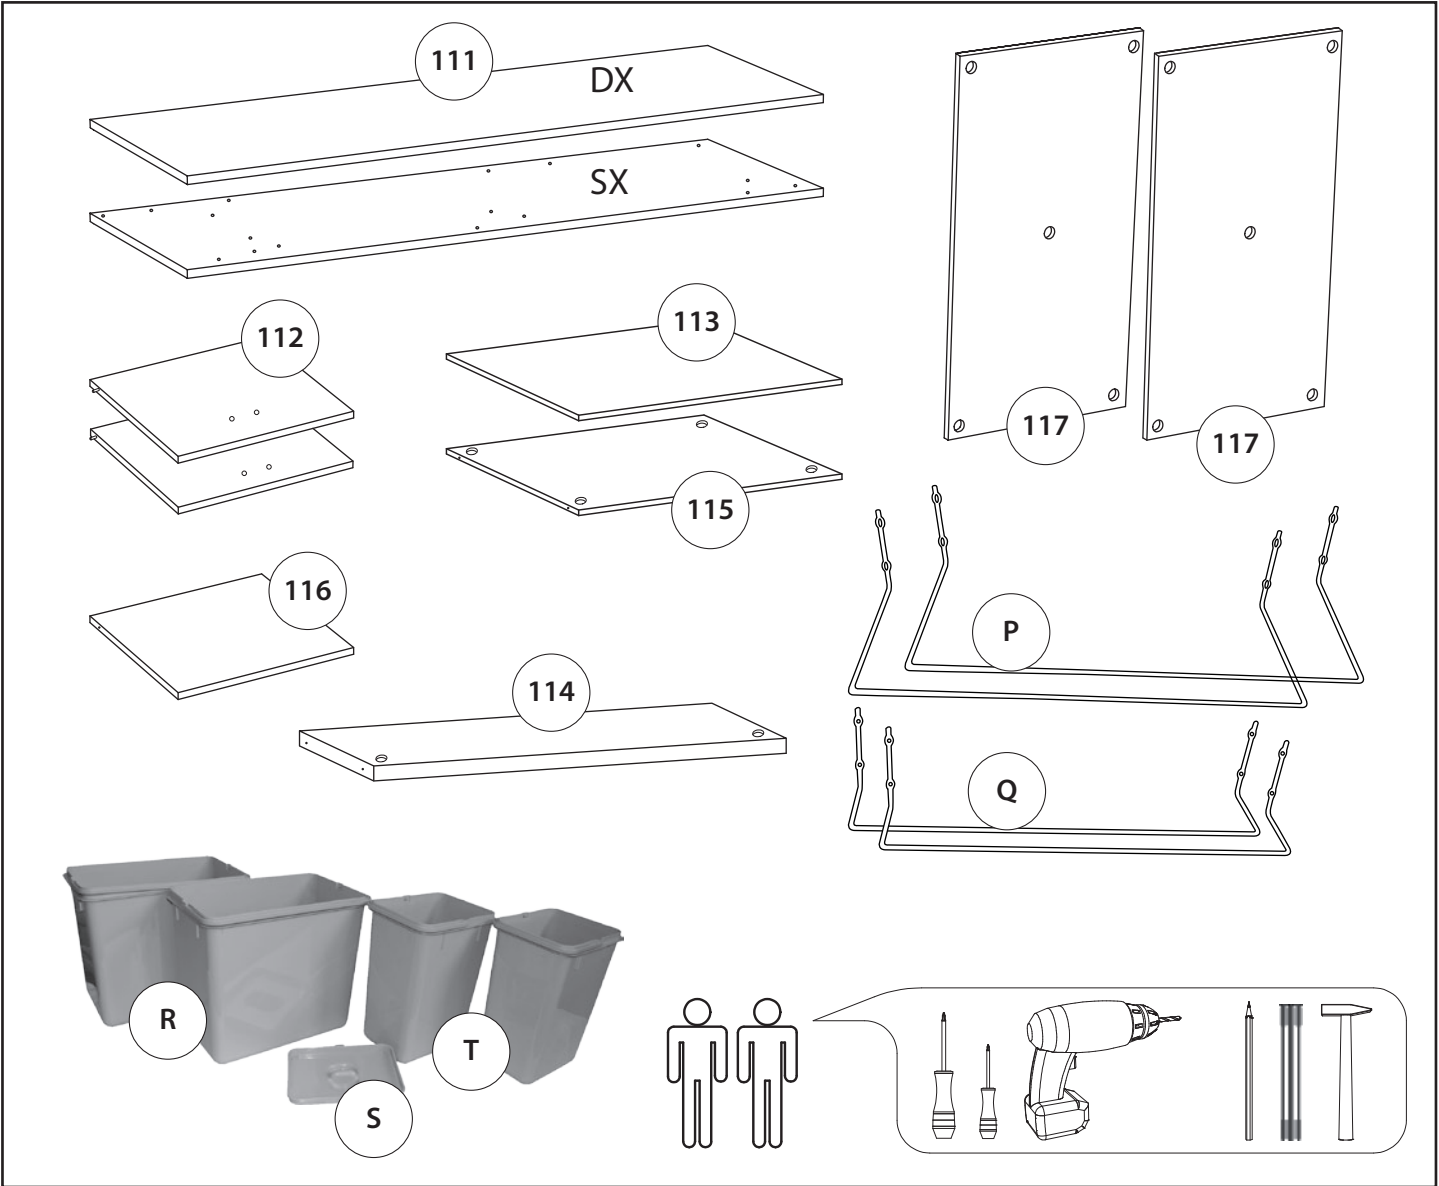

NL
Het bijgevoegde materiaal voor bevestiging aan de wand (pluggen en schroeven) is slechts geschikt voor steenharde muren (beton- resp. tegelwanden zonder extra isolatiemateriaal). Voor andere wandtypen, bijv. van gipskarton, gasbeton of wanden met holle ruimtes, moeten voor voldoende verankerung speciale pluggen en evt. langere schroeven of haken worden gebruikt.
